

# Table of Contents

## Volume 1

Context Machines . . . . .	1
<i>I.S. Anureev</i>	
Simulated Maze Solving Algorithms through Unknown Mazes . . . . .	13
<i>Michał Babula</i>	
Time-Independent Liveness in Time Petri Nets . . . . .	23
<i>Jörg Bachmann, Louchka Popova-Zeugmann</i>	
Tag Abstraction for XCCS Modelling Language . . . . .	26
<i>Krzysztof Balicki, Marcin Szpyrka</i>	
Interpretation of Some Systems Security Notions in Biological Diagnostics . . . . .	38
<i>Roberto Barbuti, Damas P. Gruska, Andrea Maggiolo-Schettini, Paolo Milazzo</i>	
Nonviolence Petri Nets . . . . .	50
<i>Kamila Barylska, Lukasz Mikulski, Edward Ochmański</i>	
On the Single-periodic Representation of Reachability in One-counter Nets . . . . .	60
<i>Vladimir A. Bashkin</i>	
Java $\Omega$ : A Translation Semantics for Closures in Java . . . . .	72
<i>Marco Bellia, M. Eugenia Occhiuto</i>	
Update of Probabilistic Beliefs: Implementation and Parametric Verification . . . . .	84
<i>Katarzyna Budzyńska, Magdalena Kacprzak, Paweł Rembelski</i>	
Agent Oriented Techniques for Programming Autonomous Robots . . . . .	96
<i>Hans-Dieter Burkhard</i>	
Extending the HCBR Adaptive Behavior Control to Multi-Robotics Humanoid Soccer . . . . .	108
<i>Hans-Dieter Burkhard, Bassant Mohamed El-Bagoury, Heinrich Mellmann, Abdel-Badeeh M. Salem</i>	
Algorithm and Agent . . . . .	115
<i>Krzysztof Cetnarowicz</i>	
On Synthesis and Analysis of Net Structures and Transition Graphs with Inhibitor Relations . . . . .	127
<i>Ludwik Czaja, Manfred Kudlek</i>	

## VIII

Algorithm for Feature Subsets Quality Boosting . . . . .	134
<i>Pawel Delimata, Zbigniew Suraj</i>	
Developing Parallel Programs with Algebra of Algorithms and Heuristic Facilities . . . . .	142
<i>Anatoliy Doroshenko, Mykola Kotyuk, Sergiy Nikolayev, Georgiy Tseytlin, Olena Yatsenko</i>	
Can Robots Solve the Assignment Problem? . . . . .	154
<i>N.O. Garanina, N.V. Shilov, and L.E. Konyaev</i>	
Judgement of Satisfiability Under Incomplete Information . . . . .	164
<i>Anna Gomolińska</i>	
CBR-based Retrieval Technique for Clinical Research Support . . . . .	176
<i>Nadezhda Govedarova, Sonja Niepage, Hans-Dieter Burkhard</i>	
Open Maps Account of Timed Barbed Bisimulation . . . . .	185
<i>Natalya Gribovskaya, Irina Virbitskaite</i>	
Process Defined Security . . . . .	197
<i>Damas P. Gruska</i>	
Dynamical Version of the Intelligent Catalogue in the Project OpEN.SC Project . . . . .	209
<i>Friedrich Hildebrand, Gabriela Lindemann-von Trzebiatowski, Danilo Schmidt</i>	
Towards Formal Testing of Jet Engine Rolls-Royce BR725 . . . . .	217
<i>Greg Holland, Temesghen Kahsai, Markus Roggenbach, Bernd-Holger Schlingloff</i>	
Improved method of verifying Estelle with VerICS . . . . .	229
<i>Agata Janowska, Tomasz Uliński</i>	
Learning a Rule-based Similarity: A comparison with the Genetic Approach . . . . .	241
<i>Andrzej Janusz</i>	
A BDD-based BMC Approach for the Verification of Multi-Agent Systems	253
<i>Andrew V. Jones, Alessio Lomuscio</i>	
On Defining Safeness for Object Nets . . . . .	265
<i>Michael Köhler-Bußmeier and Frank Heitmann</i>	
Bounded Parametric Verification for Time Petri Nets with Discrete-Time Semantics . . . . .	277
<i>Michał Knapik, Wojciech Penczek, Agata Pótrola</i>	

Petri Nets with May/Must Semantics – Preserving Properties through Data Refinements . . . . .	291
<i>Olga Kouchnarenko, Natalia Sidorova, Nikola Trčka</i>	
Minimal Regions of ENL-transition Systems . . . . .	303
<i>Maciej Koutny, Marta Pietkiewicz-Koutny</i>	
On Closure Properties of Sentential Form Languages of Words and Multisets . . . . .	315
<i>Manfred Kudlek</i>	
On a Hierarchy of Multiset Automata . . . . .	327
<i>Manfred Kudlek, Patrick Totzke</i>	
<b>Author Index . . . . .</b>	<b>337</b>
<b>Volume 2</b>	
Test Case Generation from Workflow-based Requirement Specifications . .	339
<i>Hartmut Lackner, Jaroslav Svacina, Holger Schlingloff</i>	
Workflow Process Re-Engineering with Interacting Workflow Nets . . . . .	351
<i>Irina A. Lomazova</i>	
Partial Order Reduction for Model Checking Interleaved Multi-agent Systems . . . . .	361
<i>Alessio Lomuscio, Wojciech Penczek, Hongyang Qu</i>	
Runtime Monitoring of Contract Regulated Web Services . . . . .	373
<i>Alessio Lomuscio, Wojciech Penczek, Monika Solanki, Maciej Szreter</i>	
Model Checking Optimisation Based Congestion Control Models . . . . .	386
<i>Alessio Lomuscio, Ben Strulo, Nigel Walker, Peng Wu</i>	
Active Landmark Selection for Vision-Based Self-Localization . . . . .	398
<i>Heinrich Mellmann</i>	
On Distributing Coalition Structure Generation . . . . .	406
<i>Tomasz Michalak, Jacek Sroka, Michael Wooldridge, Peter McBurney</i>	
Extending the Description Horn Logic DHL? . . . . .	419
<i>Linh Anh Nguyen</i>	
Checking Consistency of an ABox w.r.t. Global Assumptions in PDL? . . .	431
<i>Linh Anh Nguyen, Andrzej Szalas</i>	
Parametric Model Checking with VerICS . . . . .	443
<i>Artur Niewiadomski, Wojciech Penczek, Agata Pótrola, Maciej Szreter, Andrzej Zbrzezny</i>	

A Case of Planning and Programming of a Concurrent Behavior: Planning and Navigating with Formations of Robots . . . . .	455
<i>Paweł Ośmiałowski</i>	
Petri Hypernets with Constraints . . . . .	467
<i>Wiesław Pawłowski</i>	
Several Remarks on Extensions and Restrictions of Information Systems: the Lattice Theory Perspective . . . . .	480
<i>Marek Pałasiński, Krzysztof Pancierz</i>	
On Intensional Aspects of Concepts Defined in Rough Set Theory . . . . .	486
<i>Lech Polkowski, Maria Sementuk–Polkowska</i>	
Discovering Implicit Dependencies Between Source Code Artifacts by Mining Software Development Processes . . . . .	498
<i>Lukasz Puławski</i>	
Associative Omega-Product of Traces Represented by Projections . . . . .	505
<i>Roman R. Redziejowski</i>	
<i>Mouse</i> : From Parsing Expressions to a Practical Parser . . . . .	514
<i>Roman R. Redziejowski</i>	
Boolean Functions Minimization on Patterns . . . . .	526
<i>Bohdan Rytsar</i>	
Approximation Spaces Revisited . . . . .	538
<i>Andrzej Skowron, Jarosław Stepaniuk, James F. Peters, Roman Swiniarski</i>	
SAT as a Programming Environment for Linear Algebra and Cryptanalysis	550
<i>Marian Srebrny, Mateusz Srebrny, Lidia Stępień</i>	
Parallel Maximum Matching with GPU . . . . .	562
<i>Piotr Stańczyk</i>	
Toward Intelligent Searching the Rough Set Database System (RSDS): an Ontological Approach . . . . .	574
<i>Zbigniew Suraj, Piotr Grochowalski, Katarzyna Garwol, Krzysztof Pancierz</i>	
Approximation of Loss and Risk in Granular Context . . . . .	582
<i>Marcin Szczuka</i>	
Probabilistic Sorting . . . . .	594
<i>Roman Szostek</i>	
Performance Evaluation in dtsPBC . . . . .	602
<i>Igor V. Tarasyuk</i>	

Global Decisions Taking on the Basis of Multi-Agent System with a Hierarchical Structure and Density-Based Algorithm ..... 616  
*Alicja Wakulicz-Deja, Małgorzata Przybyła-Kasperek*

Petri Nets with Time Windows: Liveness Behavior and Time Deadlocks . 628  
*Jan-Thierry Wegener*

Multiplicative Transition Systems ..... 637  
*Józef Winkowski*

Rough Sets and Near Sets. Perceptual Topologies of Indiscernibles ..... 649  
*Marcin Wolski*

SAT-based Searching for  $k$ -quasi-optimal Runs in Weighted Timed Automata ..... 661  
*Bożena Woźna-Szcześniak and Andrzej Zbrzezny*

**Author Index** ..... 673
